Re: UL Certification (File # E344910)

To Whom It May Concern,

Haydon Corporation is a UL listed company. Haydon Corporation's H-132 PG and the H-132-KO PG (KO - Knock-out) are produced in compliance with **UL Standard 5B – Strut Type Channel Raceways and Fittings**. The H-132 PG raceway is produced with no holes or slots in accordance with the UL Standard 5B. Haydon cannot provide, nor can any other company, slotted raceway that is UL certified. The two are mutually exclusive. The UL Standard 5B clearly states in section 4.4:

4.4 - A strut-type channel raceway system shall provide a complete enclosure that protects the wires installed therein against damage. The complete system, when installed as intended, shall comply with the following:

- a) There shall not be any openings that exceed 1/16 inch (1.59 mm) in width following installation of the system.
- b) A knockout shall completely cover the opening in which it is located, and the clearance between the knockout and the opening shall not be more than 0.030 inch (0.76 mm).

Therefore Haydon Corporation provides a UL certified H-132-KO PG raceway.

Haydon Corporation also offers a variety of UL certified fittings and our C-900 Enclosure Strip.

Sincerely,

Stephen B. Grissom
